 - **Am I able to use the phone throughout all of Europe?** Although Apelcom cells work all over Europe, they are initially restricted from Roaming use. So, if you want to activate this feature you must follow a procedure and make a new deposit to activate **the Roaming service**. **We advise you that:**
 - **Incoming calls are not free.** The price per minute, for both incoming and outgoing calls, depends on the country you are in. We can not guarantee a fixed rate. As a consequence, the rates will be much different from your plan inside Spain, much more expensive in general, (i.e. 1.70/min).
 - **Incoming text messages are free.** Outgoing text messages cost from €0.66 to €1.30 depending on the country's operator.
 - You will also be charged for retrieving voice messages, or for leaving them.
 - **Procedure: A new deposit of 250,00 € is mandatory.** Please, read all of the new conditions carefully before signing. Note that you will not be allowed to have Roaming service the last month of your program or your phone service with Apelcom.in Spain.
 - **Mundial Card:** We recommend using our International Card as a much more convenient and economical way to make calls during your trips abroad. At the same time, you can receive text messages on your Apelcom cell just as a "get in touch" device.

IMPORTANT NOTE: We can not activate Roaming if you will be travelling during your last 40 days of residency in Spain. For example, if you wanted Roaming for May 1st, but were returning to the US June 1st we can not activate Roaming.
